ABOUT THE ERP SOFTWARE

Our Manufacturing ERP Software is a comprehensive, integrated solution designed to streamline and automate all core business operations. It connects all departments, data and functions into a single platform to improve efficiency, accuracy, and decision-making.

- ✓ Real-time data and reports
- ✓ Improved productivity
- ✓ Role-based access and security
- ✓ Better control & transparency

SYSTEM USERS & ROLES

Role-based access to ensure security, accountability
and efficient operations.

01

SUPER ADMIN

HEAD OFFICE : Has full system control with access to all modules, settings, and user management.

02

WAREHOUSE MANAGER

WAREHOUSE : Manages stock storage, updates inventory, and handles material receipts and issues.

03

PRODUCTION MANAGER

PRODUCTION UNIT : Oversees production processes, allocates staff, and ensures timely product output.

04

PACKING MANAGER

PACKING UNIT : Supervises packing operations, monitors product quality, and tracks packed stock.

05

DISTRIBUTION MANAGER

DISTRIBUTION CENTRE : Controls dispatch activities, assigns delivery routes, and monitors stock movement.

06

SALES EXECUTIVE

VAN : Visits customers, takes orders, collects payments, and updates sales performance.

CORE MODULES

The ERP system is divided into powerful modules to handle all your business operations.

Dashboard &
Reporting

HR & Staff
Management

Product
Management

Production
Management
